DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-3, drawn to a method for data representation, including running a routine, classified in class 717, subclass 100.
 - II. Claims 4-5, drawn to a method for data representation, including decoding a data packet classified in class 717, subclass 140.
 - III. Claim 6, drawn to a method for data representation, including a drug delivery monitor in communication with a data stream device, classified in class 725, subclass 135.
 - IV. Claim 7, drawn to a system for data representation with an infusion pump, classified in class D24, subclass 111.
 - V. Claims 8-11, drawn to a system for data representation with a simulator, classified in class 703, subclass 11.
 - VI. Claims 12-13, drawn to a system for data representation with a data decoder, drug modeler and display generator, classified in class 703, subclass 710.
 - VII. Claim 14, drawn to a system for data representation, with a processor, classified in class 702 subclass 19.

The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 09/686,263

Art Unit: 3763

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has separate utility such as being used with a method of data representation not requiring the elements of the other as described above. The data representation method has separate utility than the decoding the drug data. See MPEP § 806.05(d).

Page 3

- 3. Inventions I and (III-VII) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the processes as claimed can be practiced by another materially different apparatus such as entering data from a chart.
- 4. Inventions II and (III-VII) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as entering data from a chart.
- 5. Inventions III-VII are each related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, each invention has

Art Unit: 3763

separate utility such as being used with a device not requiring the elements of the other as described above. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Aamer S. Ahmed whose telephone number is 571-272-5965. The examiner can normally be reached on Monday thru Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nicholas Lucchesi can be reached on 571-272-4977. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 09/686,263
